are in small supply. Exchange on Paris, \$1.95 & 31.

In money matters there is no notable change; but we have the strange anomaly of call loans being quoted higher than long commercial signatures of the favorite class. Call loans are negotiated at 6 1/2 & 7 percent, while dry goods commission house paper, 6 months to run, is scarce at 6 1/2 & 7 percent, and short dates have been done at a less percentage.

The payments by the Banks to-day to the Assistant Treasurer have been \$4,500,000, and only \$300,000 of the two years' Treasury Notes bearing 6 percent interest were used.

The accumulation of Demand Notes at the New-York Sub-Treasury is small, and they prove to be a favorite currency with all classes. The heavy disbursements of the next few weeks will create confidence in the market, and if you call to answer the old complaint within the time agreed, the plaintiffs in this action will apply to the Court for the relief desired in the complaint.

BARNEY, BUTLER & PARSONS.

Dated New York, this 1st day of November, 1861.

These cases taken in connection with the contention of business and the sale of horses admitted with the cause prescribed by the law standard, insure an easy market for the horses.

At least, these horses are not to be apprehended,

unless it proceeds from the disturbance of confidence, and this is only to be apprehended from reverse consequences.

And so it is to regard to almost every article of Western produce. Thus the abundant supply of currency, combined with the demand is explained, while the supply and demand are still in a state of equilibrium.

This is the result of the present war.
